

The NASTF AIR program (Assisted Immobilizer Reprogramming) offers repair shops a secure and efficient way to access immobilizer and key code services through trusted providers—no advanced tools or certifications needed.

With AE Tools & Computers, you can access the AIR program seamlessly, ensuring quick, reliable support for your reprogramming needs.

KEYS. MODULES. KEY BLADES.

### Save time

The traditional NASTF process can be time-consuming. With the AIR program, the entire process—form submission, approval, and code retrieval—takes under 10 minutes.

### Keep your jobs in-house

No more delays. No more subletting. Keep your customers satisfied by completing jobs in-house with ease.

1

### Create a support ticket

Our support team will contact you to provide the appropriate form and explain which documents are needed for verification. This step initiates the NASTF process.

2

### Get approved and provide payment

After submitting the completed form and required verification documents, our in-house NASTF Procedure Manager will review them.

Once approved, our technician will contact you to confirm the approval and arrange payment.

3

### Retrieve your immobilizer code

Upon receiving payment, our technician will ensure you can access the requested immobilizer PIN code, key code, or other immobilizer-related function you've purchased.
